ML: Regression

ABOUT ME

A Software Developer by training, I specialize in Machine Learning and Data Analysis. Passionate about predictive modeling and automation, I master Python to transform raw data into intelligent solutions. My technical rigor allows me to design robust and high-performing data architectures.

EXPERIENCES

November 2023 - July 2024

Web Developer (Academic Internship)

Honowa Tech

- Developed a student management application, from requirements gathering to the implementation of core features.
- Contributed to the improvement of digital tools used by the company using an object-oriented approach.
- Optimized SQL schemas for student management, ensuring data integrity and fluidity.

January 06, 2025 - May 2025

Trainee

Inch Class

- Created a web tool allowing users to search, select, and book travel trips with availability management and booking tracking.
- Designed an interactive tool to easily generate personalized CVs, with a choice of templates, sections, and dynamic layout.
- Conceived search and filtering algorithms for travel booking, focused on optimizing user results.
